

USABILITY OF APPLICATION

The application GTAcampuS is developed for Aakash Tablets with a focus on Education field. This application provides intense help for students. GTAcampuS provides features for alerting students before their class hours, so that they won't miss any classes and also it will keep the statistics of the classes they bunked which can be retrieved and viewed at any time. This application also turn the device to silent mode and turn off all alert volumes if the student is dismissing the course alert with 'ON THE WAY' option. This application also contains a timetable view which helps students always to check the class hours and courses. Also this application have tools like calculator and a convertor which are very much essential for students. One of the other feature in this application is 'GROUP MESSAGING'. This will be useful for class representatives and teachers for passing any information to all students. The message posted in the message option of one device will be transferred to the server configured and can be read by all those who have the application installed if they have an internet connection.
